

THE 3 THINGS THAT MATTER THIS WEEK

53%

Harborline is still missing its deadlines

Harborline requests finished on time: 53% in September so far, down from 78% in the spring. This week was better at 71% (15 of 21), but all 3 subpoenas on the 3-day clock were late.

\$26,467

RecordPoint owes 35% of unpaid invoices

338 open invoices, and 280 of them (\$22,017) are more than 90 days old. That is 35% of the \$75,239 open across all requestors. Michelle says they keep reporting portal login problems.

-58%

Beacon volume has been falling since May

Beacon sent 45 and 44 requests in March and April, then 12 to 18 a month since. Only 2 came in this week. Amanda noticed this week; nobody has flagged the 6-month drop.

NEEDS YOU

1. **Decide what the RecordPoint call is for.** Michelle wants a call with them. With \$26,467 unpaid, it could be a portal fix, a collections talk, or both, and that decides whether Christine joins. Asked by Michelle. No date given.

2. **Harborline recovery plan.** Four straight months under 72% on time, and the 3-day subpoena clock is missed every time this week. Worth a direct plan from Amanda with a target date. *(suggested)*

3. **Name an owner for onboarding.** 3 intake associates start Oct 5 and Kaela says there is still no onboarding plan. That is one week out. *(suggested)*

CONNECTING THE DOTS

- CONFIRMED** Christine flagged an AWS bill about 40% above July, and Heidi is already on it; she thinks the new Textract add-on caused it. The cause is Heidi's working theory, not yet shown.
- CONFIRMED** RecordPoint shows up twice: Michelle's portal complaints and the top unpaid balance. The data backs her: 22 RecordPoint portal-login tickets since March and 329 of their requests sitting in Awaiting Payment.
- LIKELY** Amanda moved 2 people off the Keystone queue in the same week Keystone Auto Group volume more than doubled (17 requests vs a 7.8 average). Keystone was 9 for 9 on time this week, but 13 of its requests are still open.
- LIKELY** The 3 intake associates starting Oct 5 are the most likely relief for Harborline, if onboarding is ready when they arrive.

LEADER VS DATA Both shown. Neither side picked.

WHAT THE LEADER SAID	WHAT THE DATA SHOWS	SOURCE
Amanda: Harborline at 5.8 days average this week.	4.8 business days average on the 21 Harborline requests finished this week (6.5 calendar days).	Every Harborline request completed Mon to Fri.
Amanda: Harborline contract is 5 days since Feb.	Since Feb, Harborline requests carry either a 5-day or a 3-day clock. This week's 3 subpoenas were on 3 days and all missed.	The deadline recorded on each request.
Amanda: Beacon had maybe 10 requests all week.	2 this week. 10 is the September total so far.	Beacon requests received, by date.
Michelle: tickets up 12% week over week, mostly status inquiries and portal logins.	3 tickets vs 2 last week, below the 6.5 weekly average. 2 status inquiries, 1 missing pages, 0 portal logins.	Support tickets opened Mon to Fri.

NUMBERS

MEASURE	THIS WEEK	CHANGE
Requests received	69	+15% vs last week (60); flat vs 4-wk avg (69)
Finished on time	86.4%	+15.2 pts vs last week (71.2%)
Avg turnaround	4.36 days	0.3 business days faster
In process now	56	Plus 953 awaiting payment
Unpaid invoices	\$75,239	982 open; \$4,223 billed this week
Support tickets	3	+1 vs last week; -54% vs 4-wk avg

On-time and turnaround count requests finished this week, in business days. Page 2 explains each number.

QUESTIONS WORTH ASKING

1. **Amanda:** Are Harborline subpoenas handled on the 3-day clock, or queued with the 5-day work? This week all 3 were late.

2. **Christine:** Can you bring the August books so we can check the AWS increase in dollars against Heidi's Textract theory?

3. **Amanda:** Why has Beacon dropped from about 45 requests a month to about 15 since May, and who owns that relationship?
- BY DEPARTMENT
- Amanda (Ops):** Harborline running hot; 2 people moved from Keystone to help.

Christine (Finance): Aug close done except 2 items. AWS up ~40%. Duplicate Iron Mountain bill voided. Cash fine. Scott reviewing a \$25k adjustment before close is final.

Michelle (CX): Wants a RecordPoint call. NPS survey goes out Friday.

Chris (Security): Pioneer Standard DDQ in, 24 questions, due Oct 9. Pen test Oct 14. No incidents.

Kaela (HR): 3 intake associates start Oct 5; onboarding plan still needed. Open enrollment emails Oct 1.

Heidy (Tech): Expedite option (EREQ-2147) in dev; UAT with Mary next week. Investigating AWS.

How I got this

Weekly Brief - week of 2026-09-21

Every number was calculated by code, not counted by hand.

WHERE EACH NUMBER CAME FROM

Requests received (69, 60, 69)	Counted every request received Mon Sept 21 to Fri Sept 25, did the same for the week before, and averaged the 4 weeks before this one.
Finished on time (86.4%, 71.2%)	Took every request finished this week and checked each one against the deadline recorded on that request. Same method for last week.
Avg turnaround (4.36 days)	Averaged the business days from received to finished for every request completed this week.
Harborline on time (71%, 53%, 78%)	Counted every Harborline request finished this week (21) and September to date (88) and checked each against its own deadline. The 78% is the average of March to May; the 6-month comparison uses full months only.
Harborline 3-day subpoenas	Split this week's finished Harborline requests by the deadline written on each one: 18 on a 5-day clock, 3 subpoenas on a 3-day clock.
Harborline 4.8 vs 6.5 days	Averaged business days, then calendar days, from received to finished for the same 21 requests, to show why a leader's figure might differ.
Beacon trend (-58%)	Counted Beacon requests received per month for the last 6 full months and compared the average of the last 3 months with the 3 before.
Keystone volume (17 vs 7.8)	Counted Keystone Auto Group requests received this week and compared them to its 4-week average.
Backlog (56 and 953)	Counted requests currently received, in review or on hold, and separately those waiting on payment.
Unpaid invoices (\$75,239; RecordPoint \$26,467)	Added up every invoice still marked open, then grouped by requestor. Invoices over 90 days are measured from the invoice date to Fri Sept 25.
RecordPoint portal tickets (22)	Counted RecordPoint's support tickets tagged as portal login since March 1.
Support tickets (3, 2, 6.5)	Counted tickets opened this week, last week, and averaged the 4 weeks before this one, then grouped this week's by category.

FILES READ

- Leadership updates for the week of Sept 21 (Amanda, Christine, Michelle, Chris, Kaela, Heidi).
- The request export, the invoice list and the support ticket log from the requests folder.

LEFT OUT ON PURPOSE

- One personnel item from the Operations update was left out because it concerns an individual's performance. Ask me if you want it included.
- The Harborline contract documents and the August books were not reviewed; they were not part of this request. The contract would settle which requests are on the 3-day clock.
- "Still open from last week" is not included because last week's brief was not provided.
- The AWS 40% figure and Heidi's Textract explanation come from the updates only; I did not verify them against the books.
